

Year 6
SATs

What are SATs?

These are Standard Assessment Tests. They are national curriculum tests that Year 6 children take at the end of Key stage 2.

These tests help measure the progress pupils have made and identify if they need additional support or further challenges in a certain area for when they transition to Secondary School.

They are also used to assess the school's performance and to produce national performance data.

Why are the tests so important?

- SATs results are used as a 'measure' for the progress children make during their time at primary school.
- The SATs give an insight into the standard of work and commitment expected in Year 7.
- This result will be sent to you and their secondary school. Many secondary schools no longer test in the first few weeks, but 'set' children using their SATs result.

As a result of your child's performance in the tests, they will be given a 'standard'.

This is called a scaled score.

This shows whether they are working towards, at or at greater depth within the expected standard.

Year 6 children will take the same tests.
