

# Captain Bloodbucket's Treasure Hunt

Captain Bloodbucket's map of Volcano Island is divided into 29 hexagon-shaped spaces. Unfortunately she forgot to draw a cross in the space where she buried her crew's treasure. Fortunately three of her crew can each remember something about the space where the treasure is buried. Can you combine their three clues to find the right space?

By Jonathan Emmett & Sam Caldwell

**Need some help?** Write a small "1" in all the spaces the 1st pirate is describing. Write a small "2" in all the spaces the 2nd pirate is describing and a small "3" in all the spaces described by the 3rd pirate. The treasure is buried in the only space that has all 3 numbers written in it.
